

## Impact Bars

- Unique abrasion and impact resistant qualities of Linatex natural rubber
- Excellent energy absorption
- Low friction surface coating
- Cost-effective and easy to fit
- Radiused top edges preventing damage to belts
- 2 capping thickness available for extended wear
- Cradles available to suit all standard conveyor widths

### Linatex Impact Bars

Linatex Impact Bars are made from unique abrasion and impact resistant 60 shore natural rubber.

The rubber compound provides excellent cushioning and impact absorption. The 6mm or 12mm thick, low friction UHMWPE top layer, provides a protective surface preventing wear and damage. Easily installed, using M16 bolts, the metal channel running the length of each impact bar enables easy fixing and removal.

Linatex Impact Bars are available in two thicknesses – 55mm and 75mm, by 1,240mm long. They are fitted with a standard aluminium insert for simple installation. Length can be cut to suit shorter requirements.

### Applications

- Conveyor support, feed and loading points
  - Impact Beds
  - Feed chute collectors

### Benefits

- Excellent energy absorption of Linatex rubber compound
  - Extended life
- Protective top surface provides low friction, preventing damage and reducing wear
  - Angled leading edges prevent bolt and belt damage
